

An aerial photograph of Hamburg, Germany, showing the city skyline and the HafenCity development area. The image features a mix of modern and traditional architecture, with a prominent blue semi-transparent banner overlaid on the lower half. The banner contains the title 'Digital Tools@HCU' and the subtitle 'Team Media & Didactics 10/2024'. The background shows the city's harbor, various buildings, and construction sites.

# HCU-Cloud

## What is it?

- Online file storage for saving and sharing files
- Login: <https://cloud.hcu-hamburg.de> (HCU ID and password)
- Browser, Client
- Storage space/student: 10 GB

## What is it for?

- File storage and exchange (internal & external)
- Sharing files with different permissions
- Joint editing of Word, Excel, PPT files (OnlyOffice)
- Many other functions: Calendar, project management...

## Support

- [Online self-study course](#) for HCU members

# HCU-Cloud - view

The screenshot shows a OneDrive interface with a dark blue top bar containing various icons and a search bar. On the left, a sidebar lists navigation options: 'Alle Dateien', 'Neueste', 'Favoriten', 'Freigaben' (with sub-options: 'Von dir geteilt', 'Mit dir geteilt', 'Geteilt über einen Link', 'Gelöschte Freigaben', 'Ausstehende Freigaben'), 'Tags', and 'Geteilt mit Kreisen'. The main area displays a folder named 'Digitales Lehren und L...' containing a list of shared files. Each file entry includes a checkbox, a share icon, the file name, a user profile picture, a three-dot menu, the file size, and the date it was last modified.

<input type="checkbox"/>	Name	Größe	Geändert

What are we doing for the logging points in our in-app purchases split test?  
3 replies | Last reply on Monday

Amara Nuñez 10:33 AM  
@Michael @Susan Here's the latest Mobile User Analytics Report I put together

Mobile User Analytics.pdf PDF 15KB

1 4 1

John Vu 10:35 AM  
@Alex Think we could have the GitLab build pipeline trigger the release pipeline?

Alex Rodriguez 10:37 AM  
We could definitely do that. It'd be a little more complicated since we only want builds for tags to trigger the release pipeline but it's doable.

John Vu 10:40 AM  
Great, I'll make a Jira ticket for it. Time for standup @all!

Thread Mobile DevOps Following

What are we doing for the logging points in the split test for in-app purchases?

New Messages

Ayanna Moore 10:34 AM  
We're using Splunk to monitor the logging pointes as well as to trace and analyze the data. Here is a sample dashboard.

optionC.png

Service	Region	Error Rate	P99 Duration	P95 Duration
spammer	0.25	0%	302ms	41ms
analytics	7.7	0%	13ms	12ms
ui	9	0%		
shutterstock	0.28	0%	7ms	8ms
mail	31	0%	180ms	28ms
quantile	0.5	0%	2ms	2ms
abngoc	242	0%	3ms	14ms
shutterstock	9	0%		
spammer	1.8	0%	102ms	43ms
shutterstock	18	0%	19ms	12ms
spammer	27	0%	3ms	3ms

Matt Morrison 10:37 AM  
I like the plan @Ayanna Moore!  
Let's make sure the team has access to review this.
